Manufacturing : Modern manufacturing demands systems be available 24x7

In today's global economy, manufacturing companies have an elevated dependence on their sophisticated ERP systems. These systems are vital to continued production and fulfillment of customer orders. Downtime of even one day can have a devasting impact to the viability of a manufacturing company.
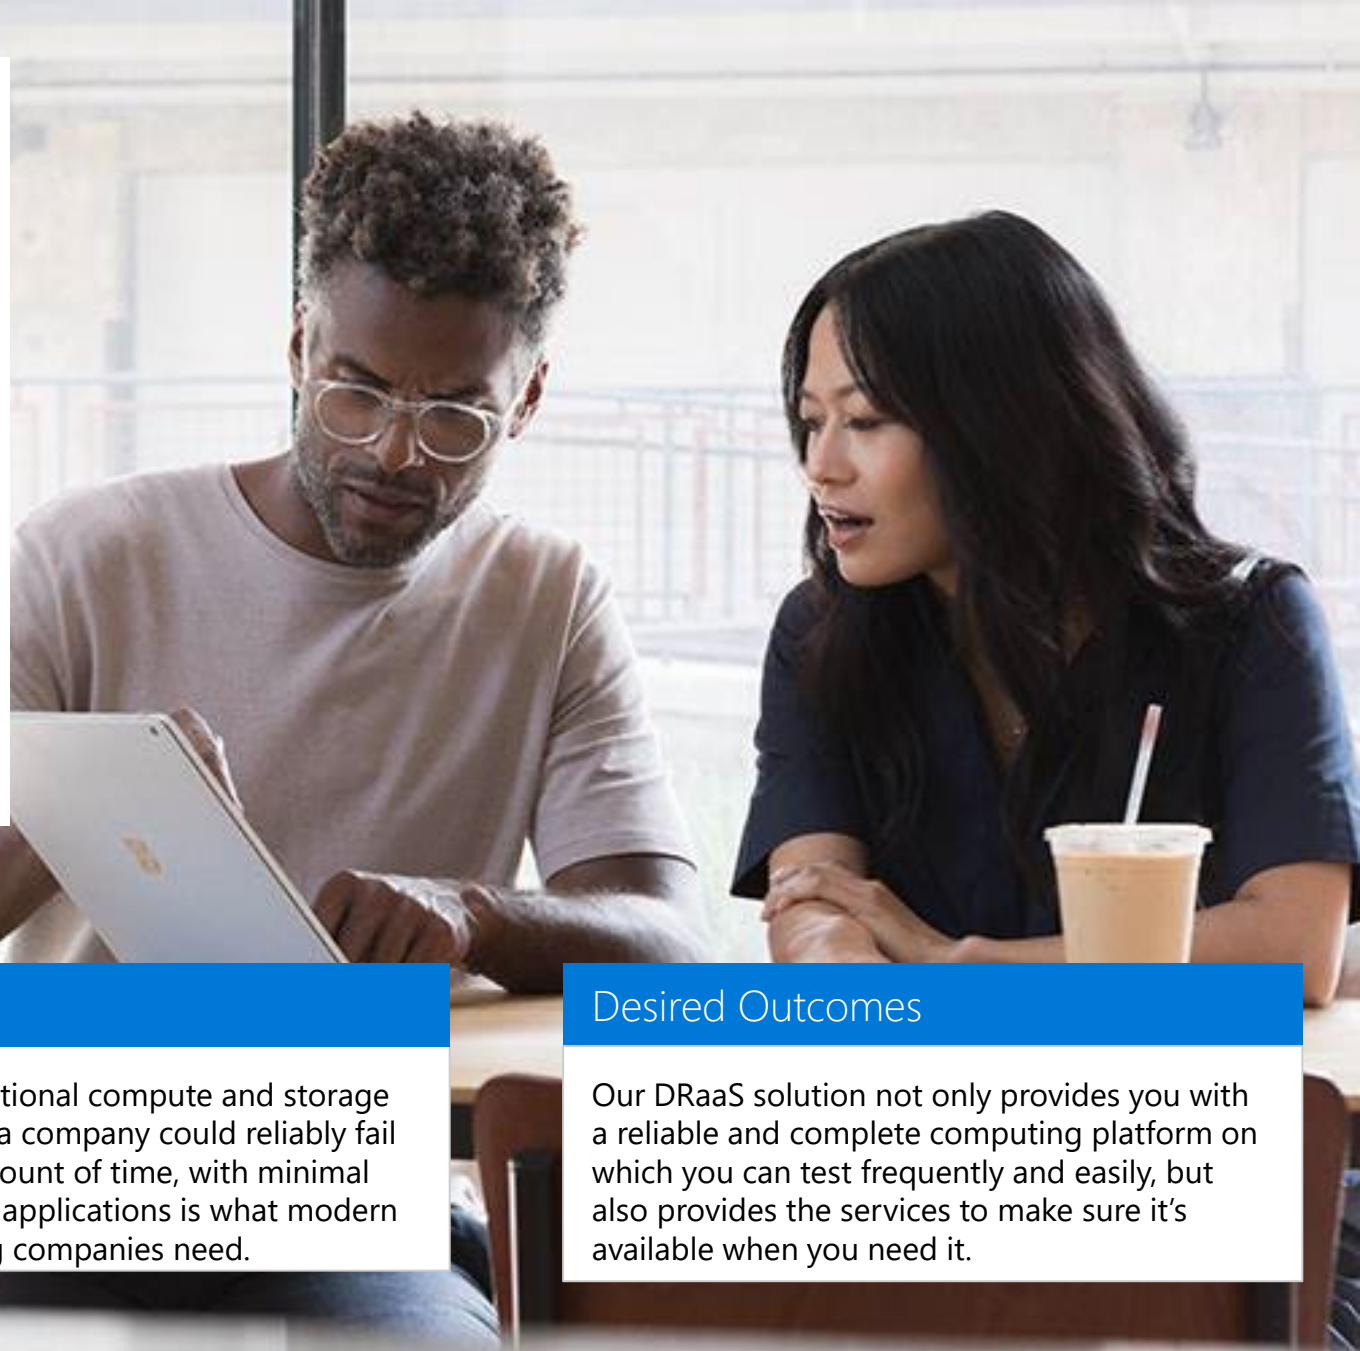

Challenges

Most manufacturing companies back up their data, but a disaster, or any interruption to their network infrastructure, could leave them without a platform to which data can be restored and on which applications can execute.

Ideal Solution

Having a fully functional compute and storage solution, to which a company could reliably fail over, in a short amount of time, with minimal disruption to their applications is what modern day manufacturing companies need.

Desired Outcomes

Our DRaaS solution not only provides you with a reliable and complete computing platform on which you can test frequently and easily, but also provides the services to make sure it's available when you need it.

BEYOND IMPACT

Beyond Impact Disaster Recovery as a Service

Beyond Impact – We Are People Who Solve. And we can solve that nagging Disaster Recovery issue that's been causing you heartburn for years. You can know your RTO! And you can know that it works, by testing and retesting, in a live failover scenario.

Follow a Proven Process

Work with our experienced DR architects to customize a DR solution to your specific RPO and RTO requirements. Working with your team, we can deliver the entire project from start to finish.

Beyond Impact's Proprietary Care

We take care of dotting the i's and crossing the t's where your DR plan is concerned. Under or vigilant watch, you can be assured that your DR plan never gets stale and that your DR resources are functioning. And we'll be engaged whether it's just a test or something more serious.

Microsoft Azure Site Recovery

Utilize the Microsoft Cloud and the mature and proven Azure Site Recovery services to keep VMs and data synchronized with aggressive RTOs.

BEYOND IMPACT

Beyond Impact's
Disaster Recovery as a Service + Microsoft Azure

We are masters of DR planning and support, that much is sure. However, every IT manager knows that a plan is only as good as the technology that underlies it and onto which it is deployed. And Microsoft's Azure Site Recovery (ASR) service and their Cloud infrastructure is what makes this all more than just a dream; it can now be reality for you.

Critical Applications – Active in ASR

Your mission critical, tier-one applications, those which your company can't do without, are discovered, configured to ASR, tested and retested. Ultimately, it can be proven with a Live Failover Test.

Active Support and Monitoring

Our experience in providing infrastructure support and monitoring of critical applications for our clients, leveraging Microsoft Azure tools, insure your DR site is ready when needed.

Active Failover Servicing

Whether you're performing monthly failover testing of your Microsoft ASR configuration, or you have an actual outage that you're experiencing, Beyond Impact is by your side in either event, assuring all goes according to plan.

BEYOND IMPACT

Customer success: Kodak Alaris' Successful Production Failover Test

"I feel no hesitancy in signaling to our company's leadership that we have confidence in a disaster recovery solution if that need were to arise. Our company's trust in the Kodak Alaris' IT department is a direct result of your high-quality work."

- Joseph Calabrese, Operations Manager

Azure Provides

Our architects and engineers worked closely with Kodak Alaris IT to build their primary production environment and all non-production environments in Azure.

Azure Replication and Backup

Our engineers configured the necessary replication targets and backup schedules to coincide with Kodak Alaris' RPO and RTO requirements. And then documented.

The Production Failover Test

Using a combination of Azure tools, Kodak Alaris and Beyond Impact were able to gracefully down the primary environment and bring the DR environment online; test communication and data integrity. Success!

BEYOND IMPACT

Put your Disaster Recovery plan on a solid foundation today!
